A12 Classic
High-End Hybrid Integrated Amplifier

Following the success of the A10 Classic, Advance Paris offers a more powerful version, with more connectors and a dual-mono construction for the amplification part.
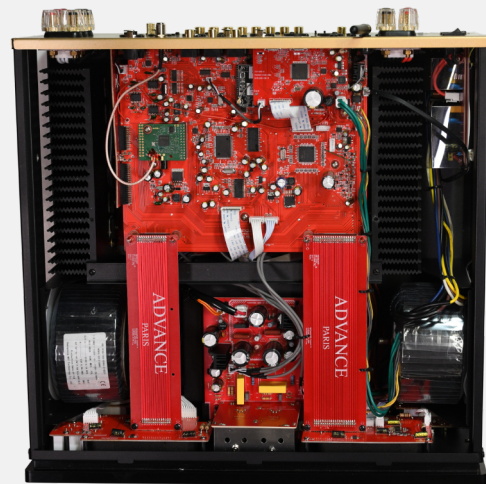

In the great tradition of Advance Paris to design products with many connectors, the A12 Classic is no exception to the rule ... From HDMI to Phono (MM/MC), analog RCA to AES-EBU, USB for computer to multiple optical and coaxial inputs, 2 speaker zones, Bluetooth (optional with X-FTB01 / X-FTB02).

The selected source is pre-amplified by a tube circuit for a musical sounding amplifier without aggressiveness.

Great power and sound quality starts with a good power supply. The A12 Classic will drive any speaker with its 2 toroidal transformers located on each side of the product. With 180W per channel in Class A/B, you can choose any speaker from bookshelf to large floorstanding.

Even the outputs are well treated with balanced (XLR) and unbalanced (RCA) Pre-OUT connectors. And don't hesitate to connect 2 subwoofers if you wish thanks to its two subwoofer outputs.

A real technology powerhouse that does not forget the music!
